What we offer

We offer a wide range of experts in the field. Our team consists of Project managers, Architects, Interior Designers, Engineers, and Draftsmen, who are trained in the latest digital design tools and we take pride in our deliverables. Our interior designing team goes all in and takes care of the following aspects:

- ✓ Space Planning
- ✓ Floor plans, flat elevations, sections, interior layouts
- ✓ 3D rendered floor plans
- ✓ 360 Degree Views and Panoramic views
- ✓ Interior 4k walkthrough
- ✓ Millwork modelling and detailing.
- ✓ Design options
- ✓ Product Modelling and Custom Furniture Design
- ✓ Architectural details and drawings
- ✓ Color palette consultation.
- ✓ Scan to BIM modeling for renovation projects
- ✓ Interior marketing presentation / Website content creation

WHY BIMagine?

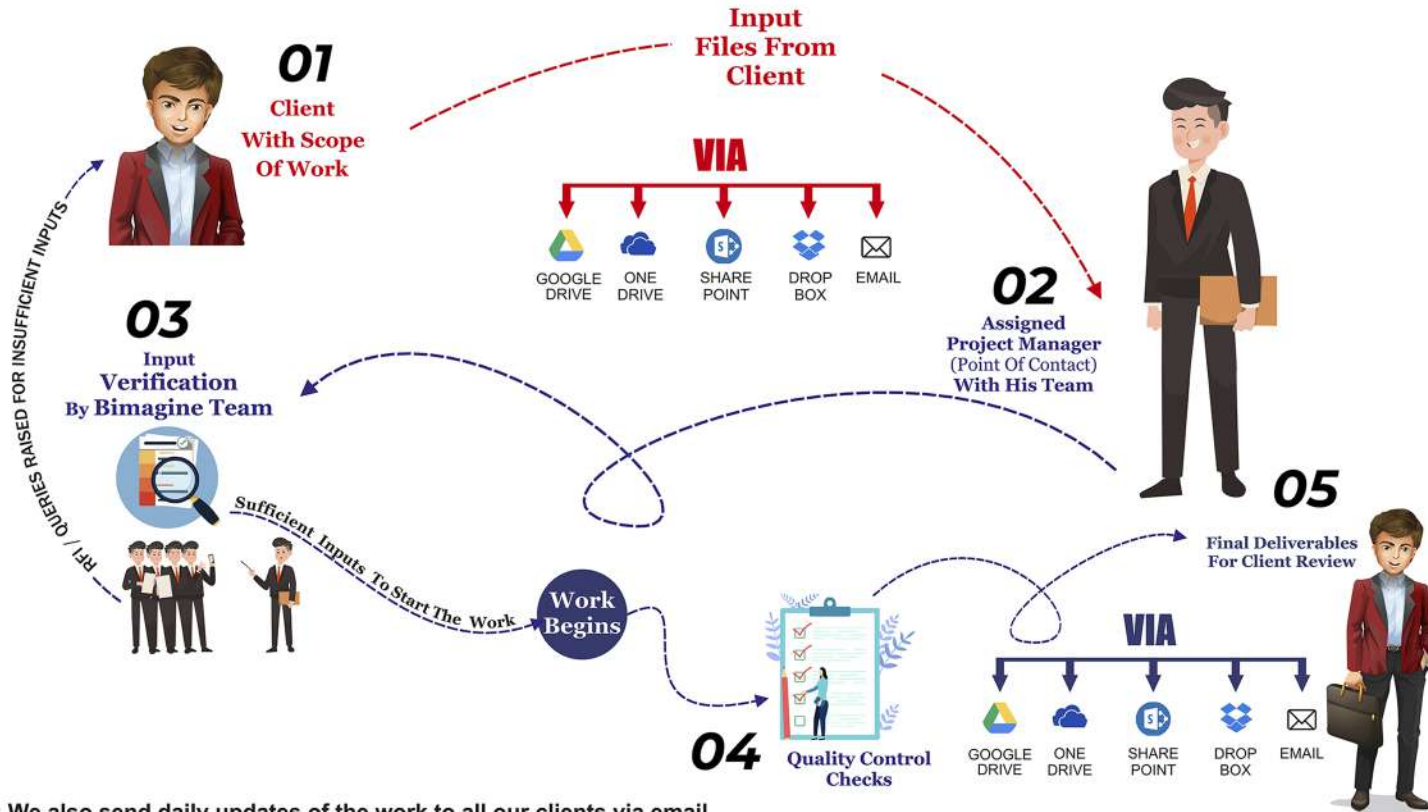

We at BIMagine Global Studio, are proud to deliver the highest quality 2D and 3D solutions along with an outstanding customer service to our clients keeping in mind the affordability of our services within the industry.

- ✓ Add Remote Employees to your Team
- ✓ Reduce Stress & Add Value to your Business
- ✓ Cut Software's Subscription Cost
- ✓ Quality assurance of each deliverable
- ✓ Letting you focus on core activities
- ✓ Cut Operational Costs & Save Big
- ✓ Daily Work Progress Report
- ✓ Deep Technical & Software knowledge
- ✓ Adaption towards International Design Codes

How we work

5' Step Process

Note : We also send daily updates of the work to all our clients via email.

Living Room

Teal blue accent chair with the art deco striped carpet might not be easy to visualise in a living room, color palette of Ivory, Wood and Grey might not sound contemporary, but we provide you our truest and most detailed renders to help you peek into you dream spaces, saving you time and money.

📍 Florida

Living Room

Living Room is the nexus of a happy family. A sunken seating sounds utopian but before its installation the idea needs to be visualised. Our rendering solutions help you envisage the combination of a sunken sectional couch, wall-mounted fire place, raindrop crystal chandelier and a timeless piece of wall clock.

📍 Ashford UK

Kitchen Space

A spacious kitchen is every women's dream.

To organise that space according to client-needs is our forte. Monochrome palette and Italian marble soothes the vibe which can be easily absorbed in our renders.

📍 Florida

Kitchen Space

More natural light and all white is a complete winner for kitchen designs. The concerns of maintaining a white space washes away, looking at clean renders.

BIMagine helps you visualise the results to the tiniest detail.

 Ashford UK

Kitchen Space

Marble countertops and walls in a kitchen with white cabinets and cane bar chairs when put together, gives a visual of sheer luxury. As contemporary as it sounds, the ambience is appropriate for a modern suburban home.

📍 Florida

Kitchen Space

As much as white kitchen is a concern for most clients, this render steals the heart. White is omnicompetent and it has the ability to deliver a clean, sleek and a modern finish to any household. This render helps you visualise space-sharing of an island kitchen with living room.

📍 Texas, USA

Dining Space

How to impress your guests other than flavourful food?

BIMagine has the perfect ambience for your dining space with accent walls, table decor and lighting ideas. Why stress on creating a mental picture when you can have one of our high definition rendered images for your visualisation?

 Ashford UK

Study Area

Work-from-home is the new normal! A study/office area is a must-have in new homes. Classic book shelves and vintage table, a perfect ambience to read a book and lighting that calms you down is not just a thought anymore. We are proud to associate emotions in our renders.

📍 Ashford UK

Conference Room

Spaces where functionality is the key, need detailed visualisation before it is built.

A conference room needs precision and an eye for the details. Positioning of the audio-video devices and seating is of utmost importance. You cannot afford trial and error on-site. Hence 3D renders are your best bet to leave an everlasting impression.

📍 Calgary, Canada

Meeting Room

Privacy and confidentiality governs this room. Black walls might sound like a big NO but when you visualise a white board on a contrast-coloured wall, the whole assembly looks like perfectly fitted jigsaw pieces. Mild presence of plants accentuates the room and helps balance the monotony of screens.

 Calgary, Canada

Bathroom

Faux marble sets the tone right for a master bathroom. Some gold accent spouts and fixtures add a feminine touch. This renders helps you visualise the palette before actually experimenting with it.

📍 Florida

Bathroom

Bathroom is a space for solitude. You need to get that space correct to ensure a calm atmosphere.

Before actually installing the expensive shower panels or the plumbing fixtures, a real-life render would do the charm, saving you time and money.
